

Partnering With Today's Industries...Ensuring Tomorrow's Future™

GENERAL INFORMATION

In today's environment, it's a challenge for any organization to ensure that all internal entities are performing at the maximum efficiency and productivity required to reach their profit goals. But you need more. You need an efficient and cost effective way to keep your facility in compliance with a growing number of regulatory requirements. You cannot afford to do less.

CRI Recycling Service, Inc. and U.S. Compliance can help. As a fast-growing environmental, health and safety (EHS) compliance services firm, we specialize in helping companies like yours achieve and maintain compliance while realizing profitable growth and productivity.

Keep up with the latest government regulations. We uphold the highest standards of quality in everything we do. Our staff continually works to keep pace with the very latest government regulations and how they apply to the growing and changing needs of our clients.

Avoid non-compliance lawsuits and fines. We work in partnership with our clients to find the most effective ways to achieve and maintain compliance for their specific facilities and avoid non-compliance lawsuits and fines. Mutual communication is paramount to the process and a key to the success of our programs.

Minimize the potential for accidents and injuries. With more than 25 years of experience in the areas of OSHA and EPA compliance, we have refined a unique and effective process to minimize the potential for accidents and injuries. Our highly qualified trainers work directly with you at your facility, conducting proactive training sessions that get your employees involved in safety and compliance, boost their interest in each training topic, and improve the working environment.

IMPLEMENTATION

The service model puts you in compliance and keeps you there. After an initial site visit for a comprehensive audit, we work with your staff to prioritize the worker safety and environmental compliance actions needed to reach and maintain compliance. Following this phase, you may choose to include the unique Partnership Service, which provides a detailed "Compliance Calendar" with program delivery dates and training schedules for your facility, and a "Safety Compliance Manual" and "Environmental Compliance Filing System" for the documentation and regulatory materials created for your company.

SAFETY COMPLIANCE PROGRAMS

Trust the experts at U.S. Compliance. You can rely on CRI Recycling and U.S. Compliance to develop a safety compliance program that will be practical to implement and easy to follow. Components of our occupational safety compliance program will include the following, as applicable:

Focus on the future – as one of North America’s leading EHS providers; we are ready to handle your compliance needs so you can focus on your growth and profitability. We look forward to partnering with you to assure high quality compliance methodologies, economical pricing and unmatched service excellence.

ENVIRONMENTAL FUNDAMENTALS MANAGEMENT PROGRAM

U.S. Compliance and CRI Recycling Service, Inc. offer an Environmental Fundamentals Management Program to assess the applicability and maintain compliance with of federal, state and local environmental regulations, mitigating risk to your company

AS AN OWNER OR OPERATOR OF A MANUFACTURING FACILITY, DO YOU FIND YOURSELF ASKING THESE QUESTIONS?

- o Which environmental regulations are applicable to the operation?
- o How do I know if our facility has identified and meets those federal, state and local regulations?
- o How do we stay current with regulations when operations are constantly changing?
- o How can I continually improve our environmental management program?

Environmental regulations can be complex and overwhelming, but the team of seasoned Environmental Specialists at U. S. Compliance can bring clarity to these rules. Whatever the situation is, we can help move the business forward. U.S. Compliance assists multiple companies and corporations to stay compliant by maintaining environmental permits, reports, plans and employee trainings. We not only identify outages, we help implement the process. Take advantage of our experience and allow us to create a solution based on your business and industry best management practices.

BENEFITS OF SERVICE

- The satisfaction of having a comprehensive Environmental Management Program implemented throughout the organization.
- Protect the business against needless and expensive fines from the EPA and local agencies.
- Peace of mind that comes with knowing there is always a team of experts to assist with the complex and ever changing environmental regulations.
- Develop or complement internal resources with a team of subject matter specialists.
- Support the legal aspects of a company Environmental Management System (EMS).
- Shared knowledge from supporting industrial clients in several industries and in every state.

TO BEGIN THE PROCESS OF MANAGING YOUR ENVIRONMENTAL PROGRAM:

Assign an Environmental Specialist who will conduct facility assessments and employee trainings, and develop the required written materials for your site.

- o Perform a baseline audit and regulatory review of operations.
 - o Develop an action plan to address potential gaps and strengths.
 - o Develop a “Compliance Calendar” that specifies reporting deadlines, inspections, permit renewals and trainings.
 - o Maintain regulatory deadlines and filings.
 - o Provide our Environmental Filing System for proper documentation and organization of regulatory materials produced at each facility.
 - o Be available to support environmental compliance questions that may arise.
 - o Track ever changing environmental regulation and re-assess annually to ensure compliance with new regulations.
 - o Regulatory inspection support and follow up, including assistance with corrective actions, penalty mitigation and regulatory responses.
-

WHAT YOU CAN EXPECT BEFORE THE FIRST VISIT:

- o An introductory phone call to capture and monitor immediate needs while launching the service
- o An visit agenda and list of materials to be reviewed
- o A pre-visit meeting at the start of the day with designated personnel to introduce the service, format, and delivery methods

OUR APPROACH

We are passionate about helping our clients maintain their compliance with environmental regulations. We know business owners and managers neither have the time nor the technical resources to keep up with ever changing governmental policies, but that's a must in today's world. And that's where we come in.

We want to be your partner – not just your consultant. Our specialists work with your team as though they are an internal environmental staff. We have gained an international reputation for being a credible, relationship-driven company that is easy to work with. We succeed because our clients do.

YOUR SUCCESS

To remain successful, we know you have to concentrate on your company's bottom line. You have worked hard and invested a great deal of time and money in your business and your employees. It's essential that your production and profitability remain high while still maintaining compliance with ever-changing government regulations.

Our structured, yet cost-effective Fundamentals services will assist you in complying with EPA regulations, through partnership with a team of experienced professionals.

OUR EXPERIENCE

After 25 years in business we continuously adjust and refine interaction and support for our clientele. Thousands of companies across the world have benefited from our services and we want to provide your facility the same level of service that we have shown others. Allow us the opportunity to demonstrate how Environmental Fundamentals Management can benefit your long- and short-term strategic goals.
